

PROGRAM : 3

Create a HTML page with different types of frames such as floating frame,navigation frame & mixed frame.

Mixed frame

```
<html>
<head>
<title>
</title>
</head>
<frameset cols="30,70">
<frame src="home.html">
<frameset rows="60,40">
<frame src="frame1.html">
<frame src="home_basetags.html">
</frameset>
</frameset>
</html>
```

Navigation frame

```
<html>
<head>
<titl>register</title>
</head>
<body bgcolor="lightblue">
<nav><br>
<a href="mca.html"><h1>HOME</h1></a><br>
<a href="prgrm5.html"><h1>REGISTER</h1></a><br>
```

```
<a href="contact.html"><h1>COURSES</h1></a>
```

```
</nav>
```

```
</body>
```

```
</html>
```

Floating frame

```
<html>
```

```
<head>
```

```
<title>contact</title>
```

```
<body>
```

```
<iframe src="contact.html" height="300" width="300">
```

```
</iframe>
```

```
</body>
```

```
</html>
```
